

ALLIED HEALTH

What tasks could a student on placement do?

- Apply the basic principles and practice of infection prevention and control including hand hygiene, donning and doffing of PPE and cleaning tasks.
- Observe and record hazards and risks including completion of incident forms
- Assisting clients with movement including the skills and knowledge to support people who require assistance with basic physical movement
- Preparing equipment and resources for client sessions.
- Assist with other allied health programs including supporting the allied health professional in following treatment plans and therapy sessions for individuals and groups.
